

## BOSCH PDO MULTI

Haben Sie im Baumarkt bereits unzählige Billig-Detektoren gekauft und keiner hat richtig funktioniert? Es ist Ihnen nicht gelungen zuverlässig Stromleitungen aufzuspüren? Die Leuchtdioden waren eher als Lichtorgel statt Detektor zu gebrauchen? Der Billig-Detektor zeigte ein Signal, wo definitiv keine Stromleitung verlaufen konnte?

Dies ist mit dem BOSCH PDO Multi nun endlich vorbei!

Das Gerät gehört auch im Profibereich zu den beliebtesten und zuverlässigsten Geräten auf dem Markt. Der PDO Multi ist bestimmt zur Suche nach Metallen (Eisen- und Nicht-Eisenmetalle z.B. Armierungsseisen), Holzbalken sowie spannungsführenden Leitungen in Wänden, Decken und Fußböden.

Amazon berechnet die Sternbewertungen eines Produkts mithilfe eines maschinell gelernten Modells anstelle des Durchschnitts der Rohdaten. Das maschinell gelernte Modell berücksichtigt Faktoren wie das Alter einer Bewertung, die Beurteilung der Nutzlichkeit durch Kunden und ob die Bewertungen aus geprüften Einkäufen stammen. Bitte versuchen Sie es später noch einmal. Seb 3,0 von 5 Sternen Im Prinzip muss man weiterhin mit Kopfen arbeiten und kann dieses Gerät dann zur Bestätigung verwenden. Aber einen Röntgenblick ersetzt dieses Gerät sicher nicht. Ich habe schon Locher gebohrt nachdem das Gerät angezeigt hat, das was im Weg war und ich konnte es aber nicht glauben es war nichts im Weg. Ich habe Locher

gebohrt als das Gerät anzeigte, es sei nichts im Weg. Ich bin in einem Leerrohr inkl. Kabel zur Steckdose gelandet und konnte rechtzeitig aufhören, nachdem ich gemerkt habe, dass dort ein Hohlraum in der Wand ist. Meine Wände bestehen zu 90% aus Gasbeton, somit lassen sich Stahlflechte eines Stalbetonbaus ausschließen. Schade ich bin besseres von Bosch gewohnt. Mai 2010 Verifizierter Kauf Es arbeitet sehr genau, sodass sich die Lage von Metallen in der Wand wirklich erstaunlich exakt bestimmen lässt. Hier ist insbesondere die Pegelanzeige sehr praktisch. Mit der Zoomfunktion lässt sich die Lage der Metalle noch genauer bestimmen. Etwas ungenauer ist dagegen die Spannungsanzeige. Bei mir hat das Gerät fast auf der kompletten Wand ausgeschlagen.

Einzig darauf sollte man sich also nicht verlassen. Aber in Kombination mit dem Metalldetektor bietet es doch eine sehr gute Ortungsmöglichkeit. Die akustische Benachrichtigung habe ich deaktiviert, da es beim längeren Suchen eher nervt als hilft. Sehr schön finde ich, dass das Gerät mit einem Bedienungsheftchen und einer Aufbewahrungstasche daherkommt. Im unteren Teil des Gerätes befindet sich ein Schlitz für kurze Stifte Ikea hat sich als praktisch erwiesen Bosch liefert für den Start sogar schon zwei mit. Alles in allem ein sehr gutes Gerät, wegen der relativ ungenauen Ortung von spannungsführenden Leitungen, was sich nicht abschalten lässt, gibt es nur vier von fünf Sternen. Für mich war es eine sehr lohnende Investition nach dem ich mit den 15 Euro Geräten aus dem Baumarkt immer extrem unsicher gefühlt habe. Kann das Gerät jedem empfehlen, auch wenn er meint, es nur einmal zu benötigen, gebohrt wird dann doch öfter und dann habt man das Gerät und muss nicht hoffen, keine Leitung zu treffen. April 2010 Verifizierter Kauf Es hat sich gelohnt. Das Gerät ist praktisch selbsterklärend, sicher und einfach zu bedienen und es funktioniert. Alle Leitungen wurden mir treffsicher auf den Punkt genau angezeigt. Sowohl Strom als auch Wasserleitungen waren kein Problem. Ich kann das Gerät ohne Einschränkungen empfehlen. Der Preis ist in Ordnung und fair. September 2010 Verifizierter Kauf Vor sämtlichen Bohrungen konnte man sich auf die Schnelle vergewissern, ob dort Kabel etc. Sogar beim Anbringen von Lampen an der Stahlbetondecke konnte dieses Gerät helfen. Wie jedes Andere meldet es überall zunächst Metall. Jedoch kann man Strom auf die Kabel geben und so mittels dem Bosch PDO Multi feststellen, wie die Kabel verlaufen. Einfach Klasse! September 2010 Verifizierter Kauf Ultraeinfach in der Bedienung und sehr genau in der Anzeige ist jedes Bohrloch nur da entstanden wo nichts passieren konnte.

Ich bin absolut begeistert und habe es als festes Bestandteil in meinen Werkzeugfundus integriert. März 2017 Verifizierter Kauf Mai 2010 Verifizierter Kauf Ist das eine Stromleitung ist da eine Wasserleitung, irgendwie war das nicht so angenehm und ich hab es eher gelassen. Mit diesem Gerät hat das ganze ein Ende. Kinderleichte Bedienung ermöglicht schnelles Erkennen aller Leitungen und das ganze sehr präzise. Also an alle die risikolos bohren wollen, empfehle ich diesen Kauf! Kurz Lieferung perfekt, Gerät top, Batterie dabei!, funktioniert klasse, findet von Holzlatten bis Strom alles. Bedienung etwas komplex, bei so vielen Funktionen aber verständlich, Bedienungsanleitung kostet den halben Punkt nicht weg legen, falls man das Gerät nicht jeden Tag nutzt, muss man schon nachlesen. Dezember 2016 Verifizierter Kauf It was unable to locate any studs in a partition wall at all and was telling me that the whole wall was full with live cables. Literally a wall 3.6m long by 2.3m high was completely live. Strangely enough, when I turned the device on its side horizontally, all was OK, but if I turned it through 180 so it was horizontal the other direction, the whole wall lit up as live again. I consulted some photos from the building work to estimate within 5cm of so where the studs were. Even with this information the device was unable to locate any timber studs behind 12.5mm plasterboard, and carried on telling me that the wall was live even though I could see the cable runs from the site photo. In the end to get the job done I had to tap the wall and drill a few pilot holes to locate the stud. The whole thing gives so many false positives and does not register studs that you know are there to the point that you just have no faith in using it and you might as well start drilling blind as you would have an equally high change of going through a cable or pipe as if you relied on this piece of equipment. Vielen Dank für Ihr Feedback.

Wir konnten Ihre Stimmabgabe leider nicht speichern. Bitte versuchen Sie es später noch einmal.  
But thats about it. September 2010 Verifizierter Kauf After reading the manual, and using the Zoom button for wood detection, I have to say that the detector left me less confident than before when I used to knock and listen for the hollow sound on the walls surface. So, if you, like me, wanted this device for assisting with drilling into joists behind plasterboard, its of no benefit as its completely inaccurate in this regard. I did consider returning it to the good folks at Amazon, but its saving grace was that it IS good at detecting wires behind the surface. Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es später noch einmal. Marz 2012 Verifizierter Kauf It couldnt find the studs in my oneandonly stud wall even though I know exactly where they all are. It randomly detected mains voltage even where there were known to be no cables nearby, yet sometimes failed to detect mains voltage when it was right on top of a known chase with the switchedon cable just 10mm or so below the surface. It can just about detect metal, but even then it tells me everything is nonferrous even my steel radiators. Ive read the manual and Im definitely doing everything right. Prior to buying this I respected Bosch products. This is such a disappointment. At least it allowed me to try out the Amazon returns process, which turned out to be very quick and painless. Ive now gone back to my 20 year old elcheapo stud finder and totally forgiven it for flattening its battery every time I forget to switch it off. So, a big thumbsup to Amazon, but Bosch, oh Bosch, how you have lost your way! Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es später noch einmal. Because theres not much space on the wall for the pole so I would have liked the detector to be accurate as little as 1cm diameter in circle. After buying this detector I realised I was a bit naive to have my expectation so high.

It did work as in telling you theres something inside the wall roughly around the 5cm diameter in circle. Though sometimes it gave me confusing result, such as beeping at one spot and when you rescanned the same spot a few seconds later, it didnt beep for some reason. What I think it did though was that if there was definitely no beeping, no matter how many times you scanned that spot, then its definitely safe. If it was beeping around the area but you really need to put the screw in, then it was all down to guess work, as we did in the end. For what it costs I actually think it is not a bad buy if you have a lot of space for margin of error. Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es später noch einmal. Marz 2012 Verifizierter Kauf Not used for studs as can tell where they are by tapping wall and standard spacing. My previous experience of other detectors has not been good but this one is easy to use and works great. Have a lot of other Bosch stuff and it rarely disapoints. Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es später noch einmal. April 2012 Verifizierter Kauf This does both. I used it to find pipes and cables live and dead buried beneath plaster, before drilling for fixings. The visual and sound features give a clue to the depth of the hazard and did not take long to get the hang of. On my usage the Bosch detector performed perfectly so I am delighted. Had I had it a few weeks earlier, it would have saved drilling though a live cable and the need to call out an electrician to repair the damage! Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es später noch einmal. The product was returned. Im still with my old Black and Decker scanner which only has audio warnings this Bosch was no improvement. Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es später noch einmal. August 2013 Verifizierter Kauf Be carefull use your mind not Bosch. Not Recommended. Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es später noch einmal.

Oktober 2017 Verifizierter Kauf Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es später noch einmal. Marz 2013 Verifizierter Kauf Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es später noch einmal. Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es später noch einmal. What were they thinking when they chased out that diagonal route across the living room wall. This is because, as other reviewers have mentioned, it is very sensitive and you can find it can be complaining about metal lathing under the plaster or harmless nails in battens a few centimetres away from the supposed sweetspot. If you can, try getting a feel for it using controlled conditions e.g. with some electric cable or copper pipe behind a handy piece of plasterboard or MDF. Become familiar with its

output and limitations. Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es spater noch einmal. In modern houses however you will find the use of plasterboard and wooden frame partitions. This was the reason for buying ie to use in a recently built house in order to fix items to the wall and fix a security light to the outside etc. It seems hit and miss when trying to detect wood batons and it certainly doesnt detect plastic central heating piping that is now common in modern homes. Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es spater noch einmal. September 2010 Verifizierter Kauf Better have this than nothing. Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es spater noch einmal. Mai 2012 Verifizierter Kauf Vielen Dank fur Ihr Feedback. Bitte versuchen Sie es spater noch einmal. Alle Rezensionen aus Deutschland anzeigen.
